

5G SA roaming

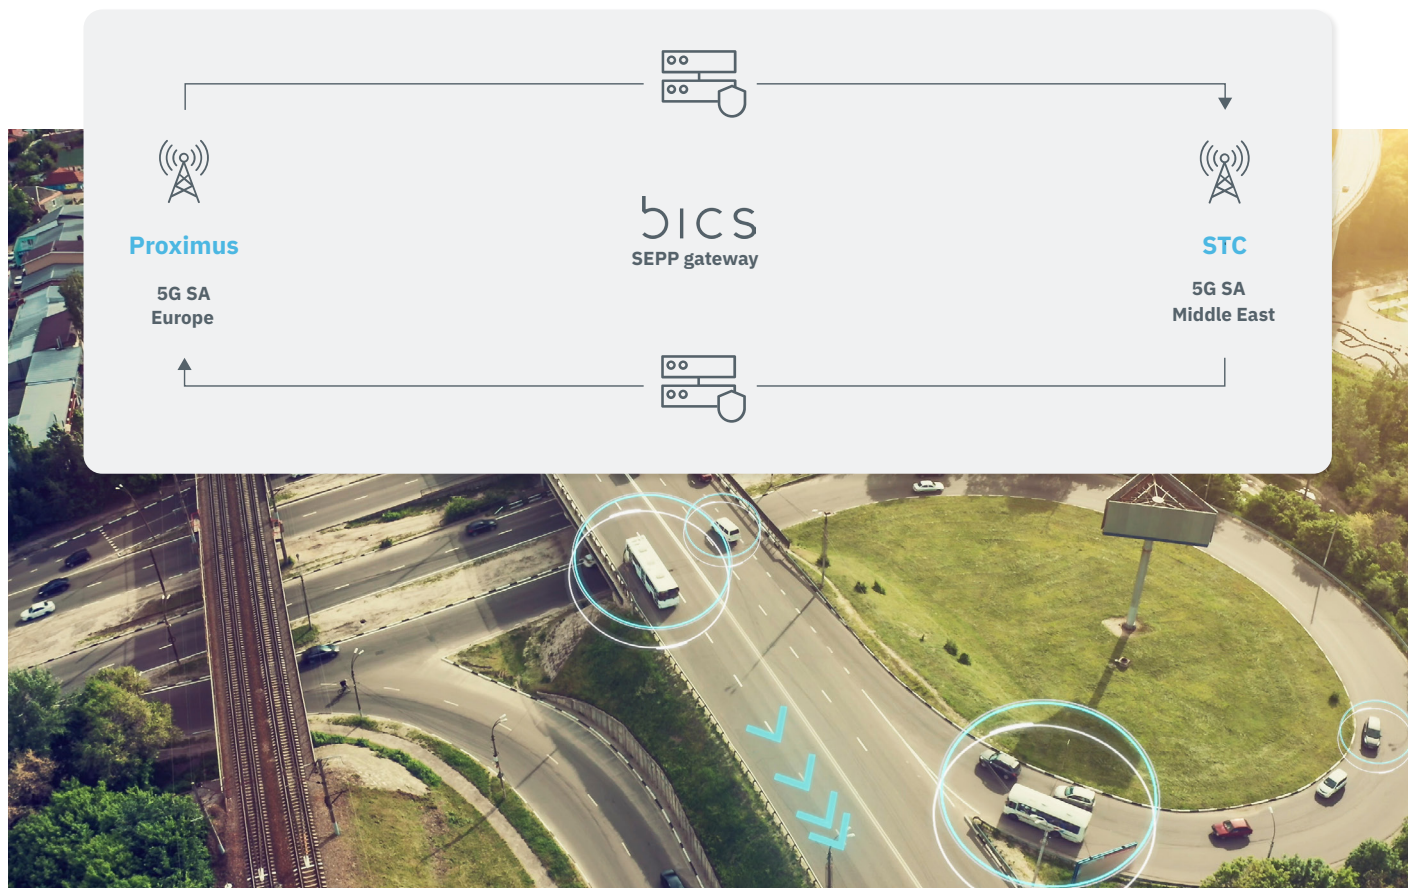

Move to the next generation of global connectivity with BICS

From lab to live

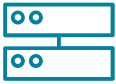

Breakthrough for global 5G adoption reached

In November 24th, 2022, BICS launched the world's first and only live 5G Standalone (SA) roaming connection between networks in Europe and the Middle East.

- This is the **first connection of its kind** to be completed in a non-lab environment
- Both mobile networks relied on a Hosted SEPP solution provided by BICS, making the roaming implementation fast and efficient thanks to the integrated management portal.

Our offer at a glance

Hosted SEPP

Integrated into our extensive IPX backbone for maximum security and lowest latency. Easily establish and manage your roaming relations and certificates with the click of a button.

Global 5G Roaming Hub

Establish new 5G roaming relations through one connection, one interface, one invoice. Let BICS take away the burden of testing while increasing your global footprint and inbound roaming revenues.

Managed Roaming Services

Let BICS take care of the complex network implementation, testing, and management of your roaming relations. Based on our global community and expertise in roaming. No need for you to re-train resources or to scale up your teams.

BICS: Simplifying the path to 5G connectivity for operators

At BICS, we aim to continuously upgrade our solutions portfolio with groundbreaking technologies to ensure the global reach, the highest integration level, and control you need – now and in the future.

Connectivity without complexity

- One partner, one bill, and one interface for all your global roaming needs
- Permanent roaming restriction solutions
- Fast time to market
- 24/ 7 customer support and customer relationship management tools
- Guaranteed Quality of Service for demanding deployments
- Network and technology agnostic
- Easy scalability into any geography

Market leadership

- 20+ years of market leadership in international connectivity and communications
- Expertize in seamless 3G/ 4G/ 5G connectivity
- Fully owned global infrastructure with 140 PoPs
- Fully managed roaming agreements with 500+ networks worldwide
